CROMOVIT CAPSULES provides the main factors that contribute to the regulation of the melanogenesis process (Copper, Phenylalanine and L-Tyrosine) and, thanks to the new active ingredient, geniposide, a glycosidic iridoid titrated at 98% in the extract of Gardenia Jasminoides ("summer snow"), increases melanocyte resistance to immunological stress, to promote the stimulation and reactivation of the so-called dormant or lazy melanocytes. Nicotinamide also reduces the side effects of UV radiation from both photo- and heliotherapy.

**GLUTEN FREE**

<b>Nutritional information</b>	per capsule	">%RNV capsule
Copper	1 mg	100%
Phenylalanine	150 mg	
L-tyrosine	60 mg	
Nicotinamide	54 mg	337,5%
Gardenia jasminoide dry extract	24,5 mg	

\*%RNV = percentage reference nutritional value (EU Reg. 1169/2011)

## DOSAGE

It is recommended to take one capsule a day. Do not exceed the recommended dose.
